Introduction

This `User's guide` document is here to help you to use this application to its fullest potential. You will learn to use our home-made API, log in with favorites services like google, twitter and even more. You will also discover, learn how to create and manage Areas. This guide is useful for both the web version and the mobile version.

Log in / Register

When you start the application, you normally arrive to a home page looking like this:

Fig 1: Napte home page

Note that this page isn't included in the mobile version of the application. Take a look at the quick presentation of our project.

1. Log in to our Area project

To sign-in for our project, you will need an account, except if you want to log in with one of the services we offer.

Click on the `Login` button in the top right corner.

This will take you to the log-in page.

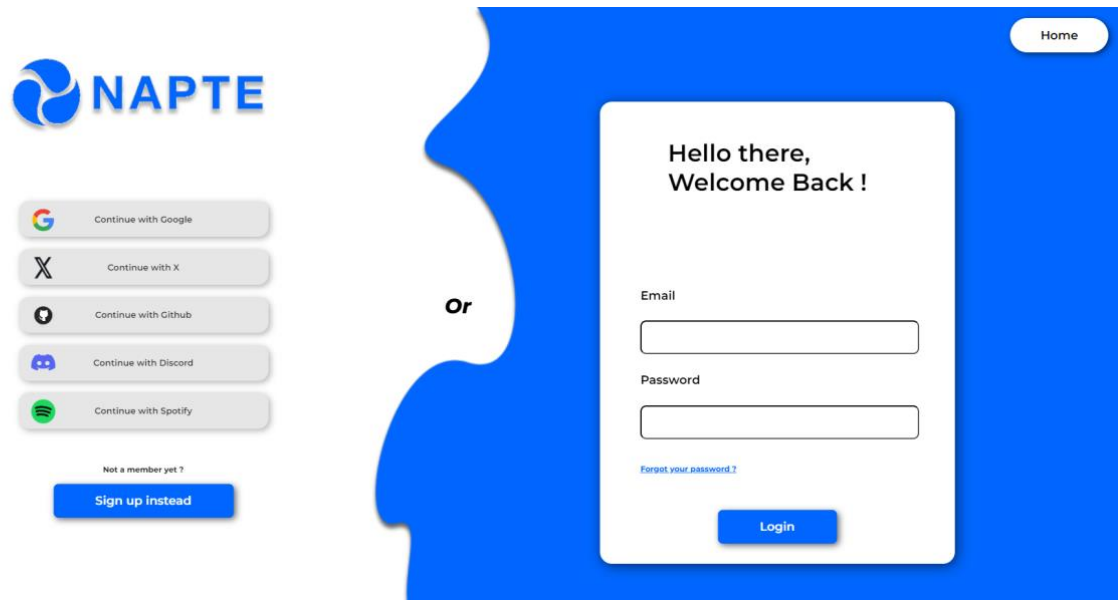

Fig 2: Napte log-in page

Here you can log-in with any of the services available on the left or enter your credentials in the form on the right.

If the connection is successful, you will be redirected automatically to the area's page.

2. Register to our Area project

If you are new to this application, you can click the `Sign up` button next to the `Login` button in the top right corner.

This will redirect you to the register page.

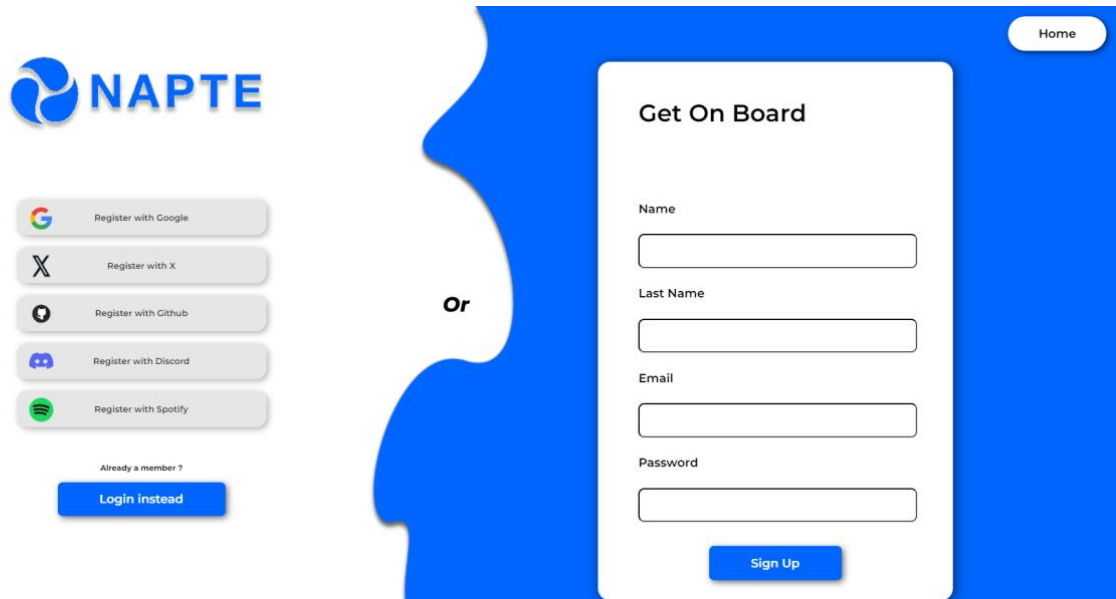

The image shows the Napte registration page. On the left, there is a vertical stack of social media login buttons: 'Register with Google', 'Register with X', 'Register with Github', 'Register with Discord', and 'Register with Spotify'. Below these is a link 'Already a member?' and a blue button 'Login instead'. In the center, the word 'Or' is displayed. On the right, there is a white registration form titled 'Get On Board' with a blue background. The form contains input fields for 'Name', 'Last Name', 'Email', and 'Password', followed by a blue 'Sign Up' button. A 'Home' button is located in the top right corner of the page.

Fig 3: Napte register page

Here you can create an account with any of the services available, or manually create an account with the form on the right.

If the connection is successful, you will be redirected automatically to the area's page.

Home

After signing-in or signing-up, you should be redirected to the main page of our project. It should look something like this:

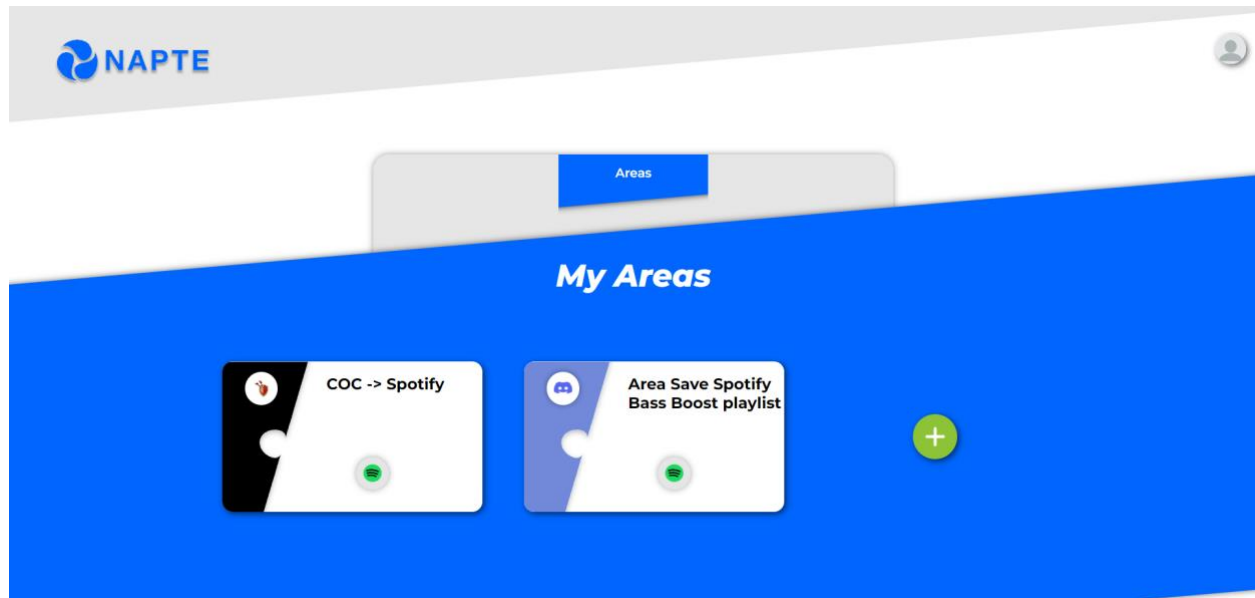

Fig 4: Napte main page

From here you have multiple options.

You can:

- Manage your profile,
- Create new AREAs,
- Manage already existing AREAs

To manage your profile, click on the picture in the top right corner. It will redirect you to the user profile page.

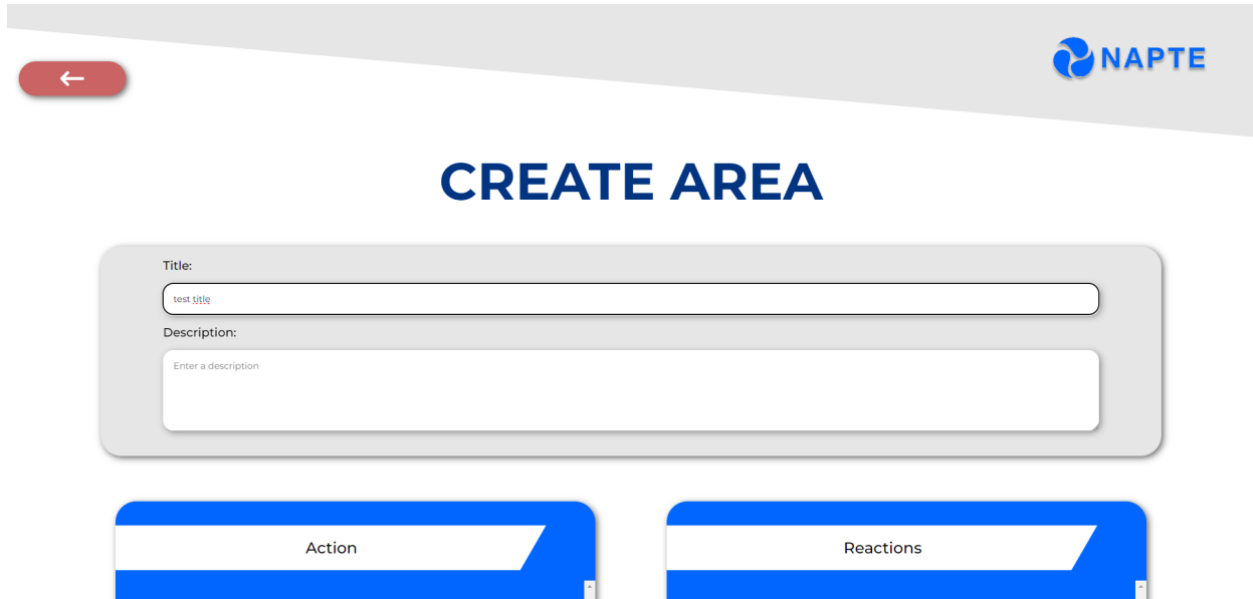

To create a new AREA, click on the green '+' button in the middle of the screen. It will take you to the AREA creation page.

To manage already existing AREAs, simply click on the card you want to edit. It will redirect you to the AREA modification menu.

AREAs management

1. Create a new AREA

By clicking on the green `+` button, you can create a new AREA.
It should redirect you to this page:

The screenshot shows the 'CREATE AREA' page in the Napte application. The header is grey with a red back button on the left and the NAPTE logo on the right. The main title 'CREATE AREA' is centered in blue. Below the title is a form with two input fields: 'Title:' with a placeholder 'test title' and 'Description:' with a placeholder 'Enter a description'. At the bottom, there are two blue containers: 'Action' and 'Reactions'.

Fig 5: Napte AREAs creation page

You can fill in the form by giving your AREA a name and a description.

By going further down, you will find two blue containers. One containing the actions, and another one containing the reactions of your AREA.

After filling out the form at the top, explore the different actions / reactions to choose the ones you want to create.

When you are done, it should look something like this, if you choose Twitter as an action, and Google Sheet as a reaction:

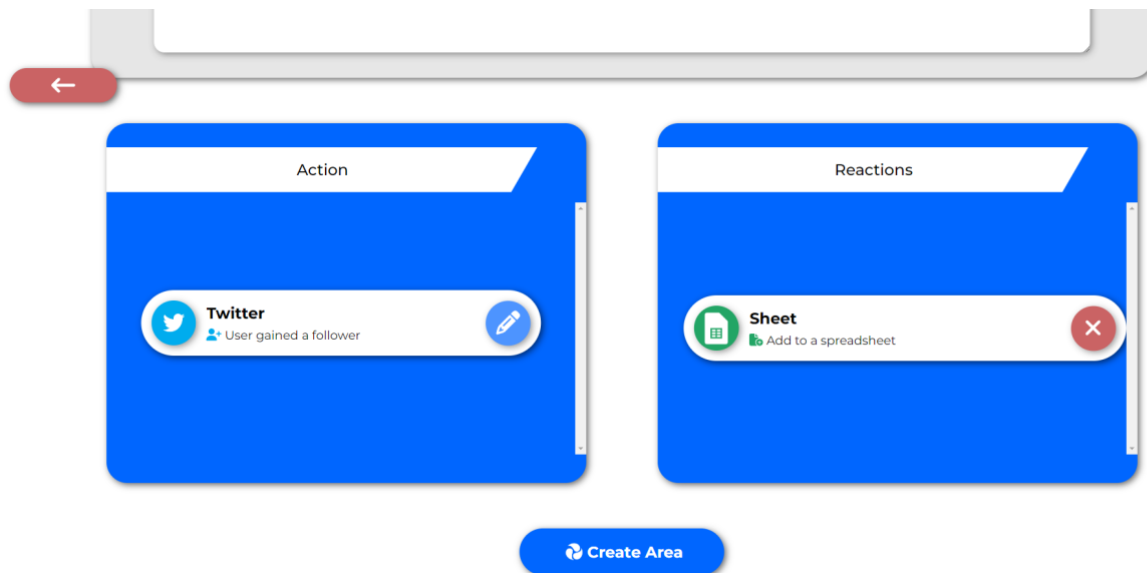

Fig 6: Napte AREAs creation page end

When you think you are done, click on the button `Create Area` at the bottom of the page, and you are done! Now you only need to wait for your action to be triggered.

2. Edit an AREA

By hovering an AREA's card, you should see an icon appearing, and the card becoming darker. From there, you should be able to modify the name, description and even the actions / reactions of the AREA.

If you want to save those modifications, simply click on the `Update Area` button at the bottom of the page.

3. Delete an AREA

Same for deleting AREAs, you need to go to the editing menu, go at the bottom, and click `Delete Area`.

It should delete the AREA from your list of AREAs.

Be careful as this deletes your AREA definitely, and there is no way to recover it.

User's options

By clicking on the character's icon in the top right corner of the main page, you should be able to see your profile, and the services you are logged-in with.

It should look something like this:

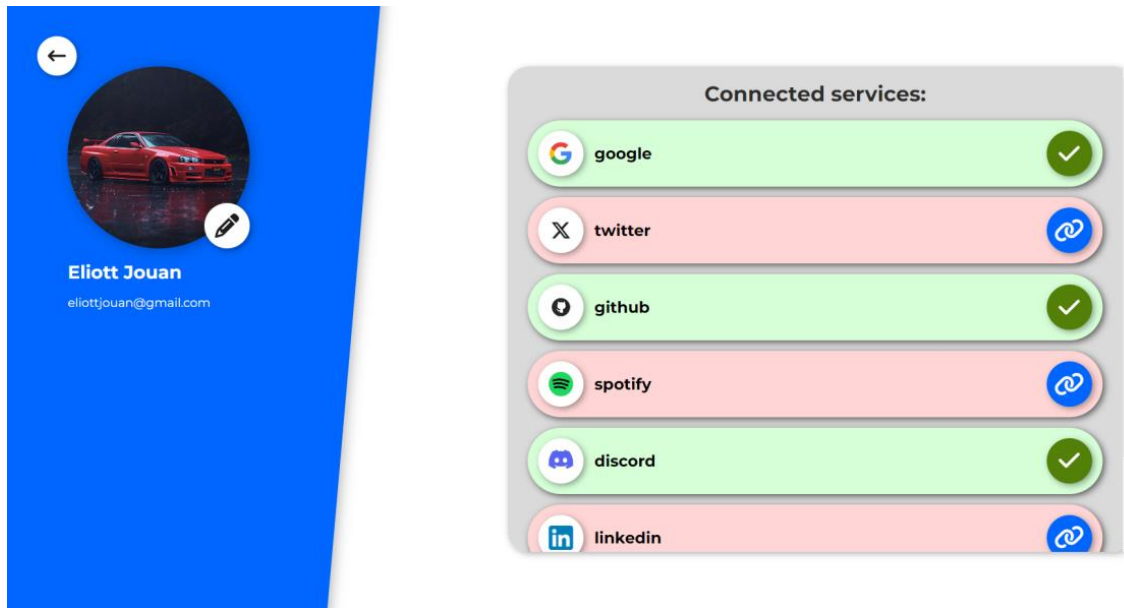

Fig 7: Napte user profile

If you wish to connect with a new service, you just need to follow the instructions when you click on the blue link icon on the right of the service.
